

SURGICAL RELEASE FORM

People Assisting Animal Control, known as PAAC wants you to understand that the risk of injury or death, although is low, is always present just as it is for humans who undergo surgery. Please make sure you carefully read and understand the following information:

1. I, acting as owner or representative of the pet named below, hereby request and authorize PAAC Veterinarians to perform an operation for sexual sterilization.
2. **I understand that some factors significantly increase surgical risk, including, but not limited to, pregnancy, being in heat, and diseases such as feline immunodeficiency virus (FIV), feline leukemia (FeLV) and heartworms. Heartworms can cause problems with the heart, lungs, blood clotting, and circulatory system. Pregnant and in heat animals that are heartworm positive are an even greater risk. A heartworm test will not be done unless it is a service I elect at intake. Dogs not on heartworm prevention have an extremely high chance of being heartworm positive due to the mosquito epidemic in our area. I understand the risk of putting a dog under anesthesia without knowing whether the dog is heartworm positive or if my dog is heartworm positive.**
3. I understand that my pet will receive a brief pre-operative examination from a PAAC veterinarian to assess my pet's general health and eligibility for surgery. Feral/community cats or fractious animals receive a visual exam only.
4. **I understand that if my animal is pregnant, the pregnancy will be terminated.** I also understand that pregnancy significantly increases the chance of post-operative complications.
5. **I understand that if my animal has a hernia, it can be repaired while under anesthesia for an additional \$10-20.** _____ Approve if needed _____ Deny if needed
6. **I understand that if my animal has a testicle that has not dropped (cryptorchid), it will be removed at the time of surgery for an additional \$10-20.** ____ I understand
7. **If my pet has tapeworms that are caused by fleas, I can elect to have them treated for \$5-10.**
_____ Approve _____ Deny
8. **If there are baby teeth that need to be removed, I understand they are \$10 each.**
_____ Approve _____ Deny
9. **I understand that if my pet is in heat or pregnant, there is an additional charge of \$10-20.** I also understand that if my pet was in heat at the time of surgery, it will take about thirty days for the hormones to leave the body and she will still attract males. The attempted breeding by a male can cause internal injury, hemorrhage and possible death. _____ I understand
10. **I understand it will take about thirty days for the hormones to leave the body of the males also.**
11. I understand, as with all surgical procedures, there is some risk in the procedure and some risk in use of anesthesia and drugs provided for the procedure. In the event of injury or death or any claims arising out of anesthesia and/or drugs connected with the performance of this procedure or any adverse reactions from vaccinations, I will not hold PAAC, its employees, directors, officers, volunteers, or contractors accountable. I agree that I will not claim any right of compensation from them, or any of them, or file action by reason of such sterilization or attempted sterilization of such animal or any consequences related to the procedure.
